Summary

Web Developer with certificate in Full Stack Development from the University of Washington, with skills in HTML, CSS, JavaScript, and responsive web design. Results-oriented polymath looking to pivot into engineering role in the tech industry. Highly adaptive in teams, continuous deployment, and tackling ambiguous challenges.

Transferable technical and creative skills from my background as a finance MBA/MA, partnering with IT peers in various industries and sectors, and my passion as a performing violinist. I've managed budgets from \$30K to over \$9B, and leveraged business intelligence to improve financial management. I'm excited to evolve into a more technical and intellectually demanding role where my impact can scale further. My relentless ability to learn new skills and achieve business impact would make me a strong addition to any web development team.

Technical Skills & Completed Projects

List applications, languages

Up to 3 strongest projects, with brief description, languages used, written link to code
